Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages

parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Concepts in Federal Taxation 2019 (with Intuit Proconnect Tax Online 2017 and RIA Checkpoint 1 Term (6 Months) Printed Access Card) Kevin E. Murphy 2018-07-31 Master the nuances of today's federal taxation using the balanced, conceptual approach in Murphy/Higgins' CONCEPTS IN FEDERAL TAXATION 2019. This edition presents the latest tax codes and changes for the most recent tax year using a clear, straightforward approach. You focus on understanding the unifying concepts behind the Internal Revenue Code rather than memorizing the details of the Code. Concepts and applications appear in brief, comprehensible segments that are ideal for CPA Exam review. In addition, examples relate concepts to familiar business scenarios while a wealth of exercises provides more practice than any other book of this kind. CengageNOWv2 online homework tool helps optimizes study. Intuit ProConnect software and RIA Checkpoint® Student Edition from Thomson Reuters also provide practice with professional tax tools as you strengthen your conceptual understanding of taxation.

Compact Utility Tractors Dennis David 2013-06-01 Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

Internal Combustion Engine Fundamentals John Heywood 1988 This text, by a leading authority in the field, presents a fundamental and factual development of the science and engineering underlying the design of combustion engines and turbines. An extensive illustration program supports the concepts and

theories discussed.

Auto Repair For Dummies Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

The Grace Walk Experience Steve McVey 2008-03-01 For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

Modern Marine Internal Combustion Engines Ievgen Bilousov 2020-06-30 This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas–diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

Renoir Götz Adriani 1999 In an exhibition shown from 20 January to 27 May 1996, the Kunsthalle Tübingen presented a thoughtfully prepared selection of many of Renoir's most important paintings from his more than five decades of creative life. The first comprehensive, scholarly retrospective ever devoted to the artist in Germany and presented only in Tübingen, the exhibition offered a view of a significant cross-section of the painter's complete oeuvre. Each of the works exhibited is illustrated in this volume in a full-page plate. Paintings representing the full spectrum of Renoir's themes and including some of the most noteworthy works in major international collections and museums in such cities as Washington, D.C., New York, Philadelphia, Sao Paulo, Stockholm, Madrid, London, Paris, St. Petersburg, Zurich, Tokyo, Hiroshima and Berlin - all were provided on loan for the exhibition - provide enlightening insights into the work of this artistic genius.

Allora and Calzadilla Specters of Noon Michelle White 2021-02-09 A beautiful presentation of a new suite of works made for the Menil Collection by Allora & Calzadilla The Puerto Rico-based collaborative duo Allora & Calzadilla created Specters of Noon as a group of seven large-scale works specifically for the Menil Collection. The ensemble is orchestrated around the idea of solar noon, a notion derived from Surrealist texts by Caillois, Césaire, and others that probe the transcultural mythology of noon--a time when shadows vanish and delirious visions momentarily reign. The works include light projections, guano, ship engines, live vocal performance, and coal. Using the Menil's Surrealist

holdings as a point of departure, Specters of Noon is infused throughout with a Caribbean perspective that addresses the instability of environmental and colonial politics; one work is a power transformer damaged in Hurricane Maria that is half-sheathed in bronze. Filled with stunning installation photography and insightful texts both commissioned and reprinted, this volume captures the spirit of Jennifer Allora (b. 1974) and Guillermo Calzadilla's (b. 1971) deeply researched and multifaceted work.
