International Sales Law Larry A. DiMatteo 2014-02-17 This book brings together the top international sales law scholars from twenty-three countries to review the Convention on Contracts for International Sale of Goods (CISG) and its role in

the unification of global sales law. It reviews the substance of CISG rules and analyzes alternative interpretations. A comparative analysis is given of how countries have accepted, interpreted, and applied the CISG. Theoretical insights are offered into the problems of uniform laws, the CISG's role in bridging the gap between the common and civil legal traditions, and the debate over good faith in CISG jurisprudence. The book reviews case law relating to the interpretation and application of the provisions of the CISG; analyzes how it has been recognized and implemented by national courts and arbitral tribunals; offers insights into problems of uniformity of application of an international sales convention; compares the CISG with the English Sale of Goods Act and places it in the context of other texts of UNCITRAL; and analyzes the CISG from the practitioner's perspective.

International Law Theories Andrea Bianchi 2016-11-10 Two fish are swimming in a pond. 'Do you know what?' the fish asks his friend. 'No, tell me.' 'I was talking to a frog the other day. And he told me that we are surrounded by water!' His friend looks at him with great scepticism: 'Water? Whats that? Show me some water!' International lawyers often find themselves focused on the practice of the law rather than the underlying theories. This book is an attempt to stir up 'the water' that international lawyers swim in. It analyses a range of theoretical approaches to international law and invites readers to engage with different ways of legal thinking in order to familiarize themselves with the water all around us, of which we hardly have any perception. The main aim of this book is to provide interested scholars, practitioners, and students of international law and other disciplines with an introduction to various international legal theories, their genealogies, and possible critiques. By providing an analytical approach to international legal theory, the book encourages readers to enhance their sensitivity to these different approaches and to consider how the presuppositions behind each theory affect analysis, research, and practice in international law. International Law Theories is intended to assist students, scholars, and practitioners in reflecting more generally about how knowledge is formed in the field.

International Higher Education's Scholar-Practitioners Bernhard Streitwieser 2016-03-01 The idea of the professional who bridges both research and practice has been largely overlooked and at times even disregarded by the academic and administrative structures that govern activity in higher education today. In international higher education, the number of students who now engage in mobility and exchange has expanded globally, along with the administrative cadre that manages all facets of internationalization, and the quickly growing scholarly attention to understanding the phenomenon. In this process, two distinct professional categories have emerged: those who 'study it' and those who 'do it' – the scholars and the practitioners. Practitioners are seen as those who manage the daily logistical flow of students and personnel around the globe, while scholars are seen as those who conduct research, collect and analyze data, and publish findings to inform, improve, and justify the activity. Yet this dichotomy is overly simplistic, outdated, and excludes the large and growing class of hybrid scholar-practitioners who now engage regularly in both kinds of activity. It is this rapidly growing population of bridge builders that are profiled and discussed in this book through critical essays on the

notion of the scholar-practitioner and its implication for the further development of international higher education. The chapters include detailed analyses from university faculty, senior international officers and other high-level administrators, directors of research centers, key leaders from influential professional associations and private organizations, managers of study abroad and exchange, and graduate students. This book launches a much-needed dialogue about the perception and reality, potential and promise, of the scholar-practitioner in higher education today. It will be of relevance to a wide variety of readers, from those within universities and organizations to those who are outside observers of higher education.

Where You Go Is Not Who You'll Be Frank Bruni 2015-03-17 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In Where You Go is Not Who You'll Be, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.
